PROJECT REPORT

For this task, I created and updated my profiles on GitHub and LinkedIn. These platforms are essential for building a professional digital presence.

GitHub is mainly used for sharing coding projects and collaborating with other developers. I created a profile README to introduce myself and showcase my interests in AI and machine learning.

LinkedIn is a professional networking platform where students can connect with industry professionals, apply for internships, and build their career profiles. I updated my education details and started building my profile.

In the next four years, I plan to regularly upload my projects on GitHub and connect with professionals on LinkedIn. I will also participate in coding competitions and showcase my achievements.

PROJECT REPORT

This task helped me understand the importance of maintaining a strong digital presence for future career opportunities.
