PROJECT REPORT

For this task, I explored both a coding platform and a collaboration tool. I used HackerRank to practice coding and completed a beginner-level problem called “Solve Me First.” This helped me understand the basics of problem-solving and how coding platforms work.

For collaboration, I used Google Forms to create a Digital Literacy Awareness Quiz consisting of five questions. The form included multiple-choice and short-answer questions to test basic knowledge of digital literacy among students.

Creating the form was simple and helped me understand how data can be collected and analyzed using Google Sheets. These tools are very useful for academic purposes, such as conducting surveys, quizzes, and collaborative work.

Overall, this task helped me gain practical exposure to coding platforms and online collaboration tools, which will be helpful in my academic journey and future projects.
