PROJECT REPORT

For this task, I used Canva to create a digital literacy infographic. Canva was chosen because it is easy to use and provides many templates for designing visually appealing content.

My infographic focuses on key aspects of digital literacy such as understanding digital tools, safe internet practices, and maintaining a professional online presence. I included examples of tools like Google Docs, GitHub, and LinkedIn to make it more practical for students.

While creating the infographic, I found it interesting to organize information in a visual format instead of plain text. It helped me understand how design plays an important role in communication. However, choosing the right layout and balancing text with visuals was slightly challenging.Overall, this task helped me better understand the importance of digital literacy and how it can be effectively communicated to others.
